

Power OpenClaw with Ollama

The easiest way to build with open models

```
curl -fsSL https://ollama.com/install.sh | sh
```

paste this in terminal, or [download Ollama](#)

Automate your work

Get up and running with OpenClaw, Claude Code, and more in minutes using open models powered by Ollama.

ollama launch openclaw

[See more apps →](#)

```
$ ollama launch openclaw
Installing OpenClaw...
Configuring model...
Adding web tools...
✓ OpenClaw is running
```

Start local. Scale with cloud.

Ollama's cloud gives you access to faster, larger models when you need them.

- ✓ Access larger models on datacenter-grade hardware
- ✓ Run many requests in parallel
- ✓ Get real-time information from the web
- ✓ Included free with an Ollama account

Create account

Pro

Solve harder tasks, faster

Run 3 cloud models at a time with 50x more cloud usage.

\$20 / mo

or \$200/year

Get Pro

Max

For your most demanding work

Run 10 cloud models at a time with 5x more usage than Pro.

\$100 / mo

Get Max

Your data stays yours

- ✓ Your data is never trained on
- ✓ Cloud models in United States, Europe, and Singapore
- ✓ Run entirely offline for mission critical work
